This book provides an overview of the common concepts and building blocks of patent management. It addresses executives in the areas of innovation, R & D, patent and intellectual property management as well as academics and students. The authors give valuable information on the characteristics of patent and intellectual property management, based on the collaboration with companies and organizations from Europe, China, Japan, Argentina, Brazil, India, Canada and the US. A reference for managers who want to bring information technology innovation with a clear intellectual property strategy to the market. A very readable book. Thomas Landolt, Managing Director, IBM A really comprehensive, all-in book about Patents – strategy, value, management and commercialization. And not forgetting what they are for – foster innovation. Dr. Joerg Thomaier, Head of IP Bayer Group

An exploration of how design might be led by marginalized communities, dismantle structural inequality, and advance collective liberation and ecological survival. What is the relationship between design, power, and social justice? “ Design justice ” is an approach to design that is led by marginalized communities and that aims explicitly to challenge, rather than reproduce, structural inequalities. It has emerged from a growing community of designers in various fields who work closely with social movements and community-based organizations around the world. This book explores the theory and practice of design justice, demonstrates how universalist design principles and practices erase certain groups of people—specifically, those who are intersectionally disadvantaged or multiply burdened under the matrix of domination (white supremacist heteropatriarchy, ableism, capitalism, and settler colonialism)—and invites readers to “ build a better world, a world where many worlds fit; linked worlds of collective liberation and ecological sustainability. ” Along the way, the book documents a multitude of real-world community-led design practices, each grounded in a particular social movement. Design Justice goes beyond recent calls for design for good, user-centered design, and employment diversity in the technology and design professions; it connects design to larger struggles for collective liberation and ecological survival.

International Electronics Directory '90, Third Edition: The Guide to European Manufacturers, Agents and Applications, Part 1 comprises a directory of various manufacturers in Europe and a directory of agents in Europe. This book contains a classified directory of electronic products and services where both manufacturers and agents are listed. This edition is organized into two sections. Section 1 provides details of manufacturers, including number of employees, production program, names of managers, as well as links with other companies. The entries are listed alphabetically on a country-by-country basis. Section 2 provides information concerning agents or representatives, including names of manufacturers represented, names of managers, number of employees, and range of products handled. A number of these companies are also active in manufacturing and so appear in both Section 1 and Section 2. This book is a valuable resource for private consumers.
